FOR RELEASE ON JANUARY 15, 2004

Delta's new RMC70 Series motion controllers offer more value for one- and two-axis applications

January 15, 2004 – Vancouver, WA - The new RMC70 Series motion controllers from Delta Computer Systems, Inc. offer attractive price/performance for one-axis and two-axis systems.

The initial version to be delivered, the RMC75S-MA1 is oriented toward linear motion control and includes RS232/485 Serial communications and interfaces to these absolute position transducers: MDT (magnetostrictive displacement transducer), and SSI (synchronous serial interface).

The RMC70 Series targets hydraulic, pneumatic and electric servo motion control applications with position, velocity and position/pressure control capabilities. As with Delta's other motion controllers, the RMC70 includes powerful software for easy setup, tuning, programming and diagnostics.

Steve Nylund, Delta's CEO stated, "The exciting all-new RMC70 product complements Delta's flagship RMC100 family and expands Delta markets by offering even more value for one and two axis applications."

Production is on schedule for early 2004 following a successful customer test cycle conducted in late 2003. Pricing is under \$1,000 per axis depending on quantity. As always, the RMC Series motion controllers are backed by Delta's unsurpassed 24/7 customer support.

About Delta Computer Systems

Delta Computer Systems, Inc. has over twenty years' experience developing control systems and system building blocks for the plastics, metals, automotive, forest products, entertainment and food processing industries. The company's products include a broad line of motion controllers designed to support various industry bus interfaces, and color sensors for production line applications.

Delta's motion controllers will be demonstrated during National Manufacturing Week at the National Design Exposition, **Delta booth # 1539**. Additional details and information are available on our website at www.deltamotion.com or by contacting Bill Savela, Delta Computer System, Inc. 11719 NE 95th Street, Suite D, Vancouver, WA 98682. ph 360-254-8688, Fax 360-254-5435, or email bsavela@deltamotion.com
